EXPERIENCE

Founder & Full-Stack Developer

Life Long Learners Hub

2024 – Present | Remote

- **Architected and launched 12+ interconnected platforms** across learning, identity, membership, payments, documents, graphs, and coding tools.
- **Designed a microservices-style architecture** that reduced server load by 40% and enabled scalable, independent deployment.
- **Built full-stack systems** including authentication, dashboards, member access, scheduling, collaboration, and interactive learning tools.
- **Created a unified UI/UX and brand system** across all platforms, increasing consistency and user engagement.
- **Translated digital 3D concepts into physical landmark construction**, demonstrating technical creativity beyond software.

EDUCATION

B.Sc. in Information Technology, Rayat Bahra University

2024 – 2027 | Punjab, India

Currently applying knowledge gained both inside and outside the classroom.

High School Diploma

J.W. Harris Memorial School System | Graduated 2013 | Monrovia, Liberia

PROJECTS

Life Long Learners Digital Ecosystem

2024-Present | 12+ Live Platforms

- Built a connected ecosystem including identity, payment, membership, graph, document, scholarship, and Python playground systems.
- Created browser-based coding and HTML learning tools for students and developers.

Scam Link Detection Tool

2025

- Developed a URL safety platform with 94% detection accuracy and more than 1,200 users.

LLL Volt & Interactive Apps

Entertainment & Education

- Built text-to-speech, animal sound, and interactive entertainment web apps to increase engagement.

SPECIFIC AREAS OF EXPERTISE.

- Logo Design
- System Development

SUMMARY

Full-stack developer and product builder with experience creating scalable digital ecosystems. Skilled in Python, PHP, JavaScript, UI/UX, microservices, and platform architecture. Built and deployed systems across education, identity, payments, collaboration, and coding tools.

12+ Platforms Built
